## ABOUT ME

---

*Welcome to my resume. For now, I am a junior front-end developer and my goal is to become a full-stack developer. I don't have any work experience, but I do love coding and I want to get a chance to work on projects with a team. In my opinion, once you start to learn, you can never stop, and you need more and more, there is no end point to stop. Coding is a kind of magic and when I write the code, I feel like a magician. Give me a chance to become a super magician.*
